**ErgoGenesis Announces Next Generation of 24/7 BodyBilt Chairs**  
**Next24 chairs feature patented SKYDEX technology for unrivaled comfort and durability**

NAVASOTA, TX – November 20, 2019 – ErgoGenesis Workplace Solutions is revolutionizing 24/7 ergonomic seating solutions with its introduction of the BodyBilt Next24 series. The new chair is embedded with SKYDEX, a patented polymer technology that is transforming long-shift seating in terms of comfort and durability.

“SKYDEX Technologies is a global leader in advanced impact mitigation and cushioning,” said Bernie Lynch, president at ErgoGenesis, the manufacturer of BodyBilt ergonomic seating, tools and workspaces. “SKYDEX is used in extreme-performance environments, from military to sports applications, and we’re thrilled to be the exclusive seating provider of this technology in the Next24. We’ve always pushed the boundaries of innovation at BodyBilt, and this partnership is yet another way we are bringing breakthrough solutions to our customers.”

The Next24 series offers unmatched ergonomic benefits, cost savings, and a solid warranty. The incorporation of SKYDEX technology increases durability, stability and comfort to address the demanding seating needs of command centers and other 24/7 environments with rotational shiftwork.

- more -

“We’re committed to protecting people and things that matter, said SKYDEX CEO, Alvaro Vaselli. “That’s why we’re excited to partner with BodyBilt to provide increased comfort and durability for improved productivity and overall health. The integration of SKYDEX technology into BodyBilt’s ergonomic design takes the Next24 series to an unmatched level of comfort and durability, making the product line unlike any other on the market today.”

The Next24 series is designed to be longer lasting and healthier than conventional foam solutions. SKYDEX technology dramatically reduces peak pressure and more evenly distributes force, affording the sitter greater comfort and reduced pain and fatigue over the long, intense shifts they have to work.

The BodyBilt Next24 chair will be available by December 2019.
