ErgoGenesis Launches Next24 - a New Generation of 24/7 BodyBilt Chairs
State-of-the-art chair features patented SKYDEX technology
adding extra comfort and durability

NAVASOTA, TX – Jan. 8, 2020 – ErgoGenesis Workplace Solutions is revolutionizing 24/7 ergonomic seating solutions with the launch of its Next24 series. The new chair is embedded with SKYDEX, a patented polymer technology that is transforming long-shift seating in terms of comfort and durability.

“We’re thrilled to see this product go to market,” said Bernie Lynch, president at ErgoGenesis. “By partnering with SKYDEX, one of the most trusted names in impact mitigation and cushioning, finally the 24/7 industry has a durable and comfortable seating solution,” said Bernie Lynch, president at ErgoGenesis, the manufacturer of BodyBilt ergonomic seating, tools and workspaces. We knew our customers wanted more seating comfort without compromising durability and we are proud to have answered the call with our innovative Next24 chair”

The Next24 series offers unmatched ergonomic benefits, cost savings, and a solid warranty. The incorporation of SKYDEX technology increases durability, stability and comfort to address the demanding seating needs of command centers and other 24/7 environments with rotational shiftwork.

“We continue to push the limits of our technology,” said SKYDEX CEO, Alvaro Vaselli. “The Next24 is unlike any other seating solution in the market, engineered to provide increased comfort for improved productivity and overall health, which is aligned with our commitment to protect people and things that matter.”

When compared to engineered foam solutions, the Next24 offers customers increased durability and an extended lifespan. The SKYDEX technology more evenly distributes pressure, providing greater comfort by mitigating impact on pressure points – which ultimately results in reduced risk of injury, pain and fatigue.

Next24 is now available. Visit www.bodybilt.com for more information.

About ErgoGenesis

Headquartered in Navasota, Texas and a portfolio company of Houston-based Freestone Partners, LLC, a private equity firm, ErgoGenesis, the manufacturer of BodyBilt ergonomic office seating and accessories, is dedicated to producing ergonomically correct solutions that provide comfort resulting in increased productivity.
