

SYNCHRONA

The footrest that provides support in sync with your movements.

Designed for rocking, the Synchrona goes beyond simply providing an extra foundation for your footing. Its unique design offers a balance of motion and stop points that allow you to keep your feet moving or rest them at the perfect height and angle.

MODEL MOVEMENT

The Synchrona's rocking design provides front-to-back motion as well as the ability to stop in various positions along the way. This encourages movement while sitting stationary, promoting both circulation and muscle stimulation.

FUNCTIONAL FEATURES

A grooved surface offers non-skid functionality as well as a comfortable feel.

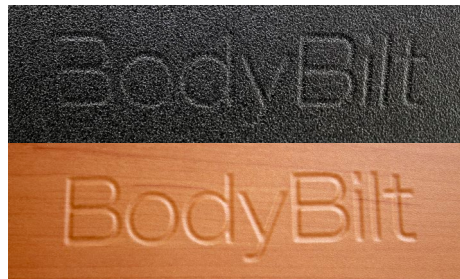

STYLED SUPPORT

The sleek, contoured platform with smooth finished edges will complement any work environment.

FIRM FOOTING

The stable, rigid leg design features a rubber strip on the bottom of leg that prevents slipping on almost any floor surface—and provides a longer life for the footrest as well.

COLOR COORDINATION

The Synchrona comes in two attractive finishes to blend with and enhance the look of any office environment—Black and Cherry. A sturdy and attractive vinyl is laminated to the footrest for years of solid support.

SIZE SOLUTIONS

Along with color options, the Synchrona comes in two different widths to provide the customized support—and movement—that you need for your feet.
