THE MIDCELLI

**INCOMPARABLE COMFORT.
INTUITIVE ADJUSTMENTS.**

BodyBilt®

THE ERGONOMIC SUPPORT YOU NEED. DESIGNED FOR YOUR COMFORT.

The Midcelli is the ergonomic chair you've been waiting for, ideal for your home or office environment.

BodyBilt once again sets the innovative standard with a perfect combination of sophisticated style, intuitive adjustments, pillow-soft lumbar, cooling airflow, adjustable mesh back - all designed with the ergonomic excellence you've come to expect from BodyBilt.

Proprietary elastomeric mesh, tensioned for just the right fit.

You can easily adjust your seat back for superior support.

Uniquely designed lumbar adds cooling and comfort.

Space-saving ULTRA Arms offer more adjustability.

Patented seat-contour designed to fit you like a glove.

A-Mechanism gives you the ability to adjust to your perfect posture.

CUSTOMIZATION BEYOND CONVENTION

SMART FRAME WITH A STANDARD HEIGHT

The Midcelli features a uniquely designed mesh back with dynamic tensioning and a disappearing edge. The height of the Midcelli back frame is perfectly engineered to suit users up to 6'1" and shorter.

SEATING SATISFACTION

The moderately contoured and minimally contoured BodyBilt seats provide more surface area for contact, reducing pain and discomfort. The Midcelli is also available with a more traditional flat seat, as well as a seat specifically designed with petite users in mind.

INTUITIVE ADJUSTMENTS

Midcelli's intelligence mechanism encourages personalized ergonomic support and motion. True to BodyBilt's ergonomics, the Midcelli performance criteria includes a seat slider, fixed or locking back tilt/rocking motion, and tension control all at your fingertips.

CHOOSE TO CUSTOMIZE

The sleek design of the Midcelli features multiple options to match your aesthetic style and needs, including multiple base and cylinder finishes and a choice of caster types.

AGILE & AWESOME

The new ULTRA Arm's sleek, space-saving design affords agility in your workspace while not compromising healthy wrist and arm postures.

SUPERIOR LUMBAR TECHNOLOGY

The Midcelli's revolutionary air cell technology with lumbar pillows encourages lower-back movement and airflow for long-term comfort.

ACUTE ADJUSTMENT MECHANISM

The A-Mechanism allows the chair to achieve an ideal seated posture between seat and back, maintaining core support, even while reclining.

ERGONOMIC EXCELLENCE & VALUE AT ITS FINEST

ERGONOMIC EXCELLENCE. SEATING SATISFACTION.

The Midcelli, featured with our new Series 3 Height-Adjustable Table and modular Keynote Monitor Arms, make for an ideal, ergonomic workspace.

As with all BodyBilt chairs, you can customize to fit your tastes and preferences:

- ULTRA or Optima arms
- More than 100 color and 6 fabric choices including antimicrobial options
- Onyx or platinum mesh
- Chrome or black base and/or casters
- Various seat sizes and contours
- Available with A-Mech or J-Mech adjustment
