

INTENSIVE USE

24/7 Series

A perfect fit with an extensive range of adjustment, the 24/7 series delivers comfort, postural support, and durability.

NEXT24

upholstered back
Starting at
\$1,149*

Next24 is the most advanced 24/7 solid foam back seating solution with superior back support. It also is embedded with SKYDEX pressure reducing technology providing long-shift comfort without giving up durability.

AIRCELLI 24/7

mesh back
Starting at
\$1,149

Aircelli 24/7 combines a seamless cool mesh back with the added support of Air Cell Lumbar™ technology. It is also embedded with SKYDEX pressure reducing technology. The super soft mesh back provides comfort and support for the back in a chair made for extended-shift use.

WHO WE ARE

Our innovative and personalized designs have made BodyBilt™ a leader in the ergonomic seating industry, supporting the employees of Fortune 500 companies and the national government.

BodyBilt™ ergonomic engineers inspired by NASA research, developed a proprietary pressure-reducing contoured seat and back that relieves your body of back and leg pain, as well as muscle fatigue by lessening the devastating effects of gravity.

24/7 SEATING

BodyBilt™ intensive-use seating is designed for users in 24-hour, multi-shift workplaces and are specifically engineered to withstand the rigors of long-shift applications.

Our chairs fit the vast majority of seated worker bodytypes. BodyBilt™ seating is built to last. Our Limited Lifetime Warranty ensures you a lasting experience of healthy and comfortable seating.

BodyBilt 24/7 Seating Solutions Supports 24-Hour Work Environments that include:

- ❖ Public Safety
- ❖ Utilities
- ❖ Process Control
- ❖ Healthcare
- ❖ Government
- ❖ Transportation
- ❖ Technology

NEXT LEVEL COMFORT, ADJUSTMENT & DURABILITY

SKYDEX

BodyBilt partnered with SKYDEX on our Next24, Intensive-Use seating line, to provide unparalleled comfort, support, and industry-leading durability. By combining the SKYDEX innovative seat cushion insert material with BodyBilt's ergonomic design, the Next 24 is ideal for long-shift seating with everlasting support and unsurpassed sustainability and comfort.

DURABILITY

SKYDEX offers 10x the performance life-cycle of foam. The material currently used in most seats is foam. SKYDEX has developed a range of seat cushion inserts that are used to either replace a foam cushion or be combined and surrounded by foam to improve comfort, reduce the transfer of vibration to the occupant and increase the lifespan of the seat cushion.

KEY BODYBILT BENEFITS

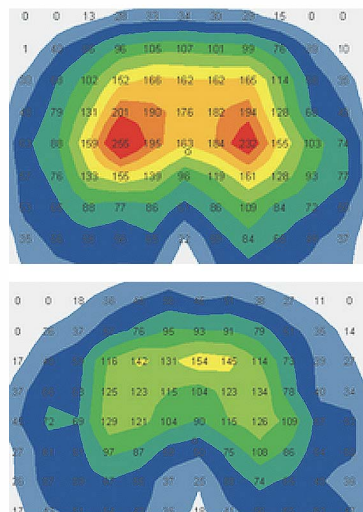

MODULARITY

BodyBilt designs and manufactures seating that is completely modular. All components of our chairs can be changed in the field to accommodate the current need.

WARRANTY

BodyBilt seating is built to last. Our Limited Lifetime Warranty ensures you a lasting experience of healthy and comfortable seating.

53% REDUCTION IN PEAK PRESSURE

Pressure mapping was performed to compare all foam cushions to a cushion with a SKYDEX insert. The red areas on the map indicate points of highest pressure (greatest discomfort), cycling through orange, yellow, green, and blue for lower pressures.

The points of highest pressure were located under the IT bones and the SKYDEX solution showed a 53% reduction in peak pressure.

- ❖ Enhanced Comfort Over Product Life-Cycle
- ❖ Resilient, Pressure Distributing Materials
- ❖ Lightweight, Low-Profile Design
- ❖ Made from Highly Durable Materials
- ❖ Designed for All-Day Comfort

FABRIC SELECTION

Cleaning and sanitizing are critical to the medical and life science community. Using fabrics that can be cleaned with EPA-Registered cleaning solutions and disinfectants is essential to prevent the growth of bacteria and other surface pathogens. Our upholstery options include Ultraleather, Brisa, Promesa, and Silvertex. All of our upholstered options have liquid and moisture-repellent, making it easier to disinfect your products.

Antibacterial | Antifungal
Mildew and Stain Resistant Vinyl | Urethane Topcoat
