

24/7 FLEXIBLE SEATING
SOLUTIONS FOR INTENSIVE USE

AIRCELLI

24/7

Shown as I2707 in Brisa Blue

The Aircelli 24/7 body-fitting back and seat contours remain the hallmark of BodyBilt's patented, ergonomic design. Its lean design and proprietary elastomeric mesh back are uniquely designed for airflow and individualized lumbar support, giving you the right amount of support in the lower and upper back region.

Work comfortably all day in an intensive use environment, modifying postural positions in a healthier posture and freedom of movement.

BODYBILT NEXT24

Dynamic Tensioning for Optimal Support

The lower back requires a more firm support, while the shoulders do not. Traditional mesh chairs offer a uniform tension in the mesh across the entire back of their chairs.

Standard Contoured Seat

Ensuring a proper fit, BodyBilt's Standard Contoured seat pan is designed to give good support in forward tilt position.

SKYDEX Innovation

SKYDEX technology inside every Next24 Chair offers a 43% Pressure Reduction and 53% Better Weight Distribution to better distribute seated pressure. Conforming to the user's shape with gradual compression, it offers enhanced unparalleled comfort throughout the day.

Greater Adjustability

With the new I-Mechanism the Next24's adjustments include backheight and angle, seat height and tilt tension, arm width and height and a seat slider in the back.

Breathable Elastomeric Mesh Back

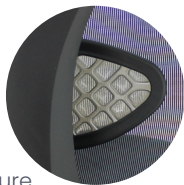

Optimal ventilation and airflow, ensuring superior comfort. Prevents the build-up of heat and moisture for extended periods of seated work.

Waterfall Edge For Freedom of Movement

Sleek design allows freedom of motion. As you recline or reach, the frame doesn't impede or hit the worker's arm or shoulder.

Aircell Lumbar

Next24 Air Cell Technology lumbar support allows for both compression and support of the lower back. It perfectly balances airflow and a glove-like fit to ensure premium ergonomic comfort.

Sturdy Steel Construction

From the heavy-duty cylinder to the reinforced steel brace bars and additional steel plate, Next24 is designed for long-term durability.

Choice of Caster and Base Options

Next24 offers the option of four different casters (3" hard floor, 3" carpet, 2" chrome and 3" large) as well as a choice of a 5-Star 27" base or a 6-Star 27" base.
