BODYBILT NEXT24

Adjustable Arms

4-way-arms provide additional stability and adjust in height, width and angle.

Standard Contoured Seat

Ensuring a proper fit, BodyBilt's most popular standard contoured seat pan is designed to give good support in forward tilt position.

SKYDEX Innovation

SKYDEX technology inside every Next24 Chair offers a 43% Pressure Reduction and 53% Better Weight Distribution to better distribute seated pressure. Conforming to the user's shape with gradual compression, it offers enhanced unparalleled comfort throughout the day.

Greater Adjustability

With the new I-Mechanism the Next24's adjustments include backheight and angle, seat height and tilt tension, arm width and height and a seat slider in the back.

Shown as I3507 with optional upgraded stitching.

Comfortable Neck Support

The neckroll is designed to support the curve of your neck and take the weight of your head off your neck and shoulders.

Levels of Lumbar

Air Lumbar allows you to adjust the level of lumbar support to perfectly meet your needs.

Sturdy Steel Construction

From the heavy-duty cylinder to the reinforced steel brace bars and additional steel plate, Next24 is designed for long-term durability.

Choice of Caster and Base Options

Next24 offers the option of four different casters (3" hard floor, 3" carpet, 2" chrome and 3" large) as well as a choice of a 5-Star 27" base or a 6-Star 27" base.
